Reasons for Allowance

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method of determining a texture and/or color formula for matching a selected color and/or texture of a selected material. Independent claims 1 and 13 identify the uniquely distinct feature "for using a mathematical model, parameters are calculated for converting the measured color signals of the calibration colors to the known colorimetric data and using the mathematical model and the calculated parameters, the color signals of the measured selected color are converted to colorimetric data". Independent claim 10 identifies the uniquely distinct feature "for wherein the measured color and texture data are used to determine, in a databank, the texture and/or color formula of which the colorimetric data and the texture data most closely match those of the selected material". The closest prior art, Yamamoto et al. (US 6,556,210 B1) and Wyman et al. (US 4,813,000) disclose wherein the texture image, L*a*b* space parameters of each tile area and each texture image are compared and a texture image having the closest space parameter is selected as the image for the corresponding tile area, and

a mosaic image is generated as well as wherein stored chromaticity data is coupled to a computer which compares it with stored chromaticity data in the computer representing available color formulas and then selects one of the stored paint formulas most closely matching the chromaticity data representing the selected color, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
